DETAILED ACTION

Election/Restriction

1. Newly submitted claims 32-41 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the medium as claimed can be used in a materially different process (MPEP § 806.05(h)), for example one not requiring correlating by a microprocessor, an angular change between the tractor and the trailer and generating a rearview mirror positioning signal as claimed.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 32-41 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 22-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. The scope of the claimed subject matter of the above listed claims is unclear. Claim 22 (see lines 3-7) recites the step of receiving a signal from a sensor, wherein the signal comprises variables selected from the group consisting of multiple alternatives, including among others the relative angular position of a towing vehicle (as taught by Wall et al.), OR a position of a

Art Unit: 3611

rearview mirror. The newly added steps of generating a control signal to position the rearview mirror and positioning the mirror based on a supplied control signal render the overall claim indefinite because it is no longer clear whether or not the received signal can be based on the relative angular position of a towing vehicle. The Markush grouping in lines 3-7 does not require the invention to include any information related to a rearview mirror, but because subsequent steps refer to the mirror as a necessary element, the examiner cannot ascertain the metes and bounds of the claimed invention.

5. Claim 31 recites the limitation "the method" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Response to Arguments

6. Applicant's arguments with respect to claims 22-23 have been considered but are moot in view of the new grounds of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3611

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
